## CYBER SECURITY

Extract maximum value from your cybersecurity investments for improved ROIs and reduced exposure. Make security simple- How to get the most from your cybersecurity investments-Detect and stop threats. This year's Cyber and Data Security Conference is much more exciting and challenging than ever.

Over the last few years, we witness major and mega cyber-attacks, which affect us all. However, by its very nature, being more connected introduces new threats, as organizational boundaries become blurred. At the same time, the tools used by attackers have become more sophisticated but also more comfortable to use. This change in the threat domain is a constant challenge for all organizations

נושאי המסלול:

Effectiveness of controls

Automated reaction to automated actions

Moving towards Managed Services and products

GDPR Readiness

Leveraging emerging and cutting edge technologies to lower down risks
